

Mark 6 Series Bench System

Designed with optimum user-friendliness, Car-O-Liner's Mark 6 Series allows accurate repairs to be made faster than ever before. Optional packages include a base frame on wheels without measuring (Mark 6.1 Package), mounted onto a scissors lift with Car-O-Mech mechanical measuring (Mark 6.2 Package) or mounted onto a scissors lift with Car-O-Tronic electronic measuring system (Mark 6.3 Package).

Mark 6

Features:

- For unmatched adaptability and efficient use of floor space, the Mark 6.1 Mobile System can be moved from workstation to workstation or out of the way or can be mounted onto an in-ground or scissors lift.
- 10-ton Draw Aligner featuring nearly continuous adjustment with 11° between each setting — the Draw Aligner makes the correct angle easy to find. This increased adjustment capacity reduces the number of readjustments needed while pulling. In addition, Mark 6's powerful Draw Aligner moves 360° around the system and has a built-in height extension for making higher pulls, faster.
- Finely milled steel frame provides a smooth, level surface for measuring equipment to rest on, resulting in to-the-millimeter accuracy.
- Optional side support system used to hold undamaged and already repaired components in place while pulling other areas. Also facilitates pushing, up pulls and down pulls.
- Standard Chassis Clamps and optional clamps hold vehicles securely even under the full 10-ton force of the Draw Aligner.
- The Mark 6 was specifically designed to provide more space between the machine's surface and the vehicle to improve access to damaged parts, tools and measuring components.
- With the 6.2 and 6.3 Packages, a hydraulic lift allows the working height to vary up to a maximum of 54". Repairs are made faster and easier because the damaged area is easier to see and reach. In addition, by allowing the work to be performed in an upright position, the Mark 6 drive-on system reduces the back, knee and shoulder fatigue that can slow down the most skilled technician.

200-MARK6.1 Mobile System Includes:

- 200-131-061-0300 Base Frame.
- 200-131-013-0350 Bench Parts.
- 200-131-010-5500 Lock Wheels.
- 200-131-038-5000 Draw Aligner.
- 200-131-111-7000 Tire Stand.
- 200-930 Double Grab Hook.
- 200-931 3/8" x 8' Chain.
- 200-205 Ram Adaptor.
- 200-701 10-Ton Hydraulic Pump, Hose and Cylinder Set.

Options:
